USING DATA TO IMPROVE OUTCOMES FOR CHILDREN

EVERY CHILD HAS A STORY...COMET HAS THE DETAILS

COMET Outcomes

Tools for collecting data via instruments and surveys. COMET was founded as a tool for measuring outcomes. This information can be used by your team to provide appropriate intervention. At its core are features to assess and understand the progress of children in your programs, to identify gaps, and report the gains.

Roster Information | Frequencies | Data Collection | Reporting
Optional Functionality Also Available

COMET Instruments | Works Without Internet
Advanced Modules

Immunization Management | Consent Management
Communication Management

COMET Operations

Tools for the day-to-day operation of organizations. As the COMET System evolved, the imperative to support "dosage" and attendance resulted in a rich set of capabilities to operate a child-focused organization, including tracking and reporting on membership, programs, classes and activities, and their associated outcomes.

COMET Outcomes | Attendance | Safe & Secure
